Summery

Hello!👋 I'm Daniel Bizualem, I am last year software Engineering student at Adama Science and Technology University. I will graduate with a Bsc. in June, 2026. I'm currently working on web app Development as a Fullstack developer. I'm passionate about developing software and solving real world problems. I have skills in today's technology in development areas like Next js, tailwindcss, Node js, Mongoose, Express js and basics of python. My core value is dedication and hard work. If I join a team of developers, I will add the value of solving problems on time.
